**DETAILED ACTION**

***Election/Restrictions***

(1)

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a laminated component, classified in class 428, subclass 457.
- II. Claims 14-17, drawn to a method if making printed circuit boards, classified in class 156, subclass 233.

(2)

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process such as etching the conductive film layer to form a conductive pattern and transferring the conductive pattern to an insulative substrate for making a circuit board.

(3)

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

(4)

A telephone call was made to Kevin Farrell on November 1, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
